Sivakasi, Tamil Nadu

Professional Summary

Entry-level Software Developer with strong foundation in Java and Spring Boot, and hands-on experience in building responsive web applications using HTML, CSS, JavaScript, and ReactJS. Skilled in REST API development and MySQL database integration. Passionate about writing clean, maintainable code and developing scalable applications.

Education

PSR Engineering College

2023–2027

B.Tech – Artificial Intelligence and Data Science

CGPA: 8.37

Tancem Matric Hr. Sec. School

2023

Higher Secondary – 70%

Experience

CodeBind Technologies – Frontend Intern

- Developed an online shopping website using HTML, CSS, and JavaScript.
- Designed responsive UI and implemented dynamic cart functionality.

Elysium Technologies – Machine Learning Intern

- Built predictive ML models using Python.
- Performed data preprocessing and model evaluation.

Novitech – Full Stack Intern (1 Month)

- Developed backend modules using Spring Boot.
- Integrated MySQL database and REST APIs.

Projects

Weather Prediction System (ML)

- Built ML model using historical weather data for forecasting.
- Performed data preprocessing and improved prediction accuracy.

Child Missing Identification System

- Developed facial recognition-based image identification system.
- Implemented image preprocessing and similarity matching.

VendorMate – GST Calculator

- Created GST calculation and invoice module using Java MySQL.
- Implemented CRUD operations with database integration.

Technical Skills

Languages: Java, Python (Basics)

Frontend: HTML, CSS, JavaScript, ReactJS, Bootstrap

Backend: Spring Boot, REST APIs

Database: MySQL

Tools: Git, GitHub

Certifications

IBM – Introduction to Software Engineering

HP – AI for Beginners

Google – Foundations of Data Science

Meta – Introduction to Frontend Development
